The Second Annual Banquet of the Order in East Liverpool One of the Finest Celebrations of the Kind Held This Season.

Though less than two years old the local council Knights of Columbus has taken a place well up in the ranks of those organizations noted for their social features. The second annual banquet of the Knights of Columbus was held last night, and proved one of the most enjoyable functions of this character ever held in the city. To the complete success of the occasion the ladies contributed in no small degree.

The entertainment was held in the Knights of Pythias hall, Fifth and Washington streets, and when Supreme Knight James Grafton wrapped for order the hall was crowded with members of the order and their friends.

The first number on the program was a seection by the Trio Mandolin club. The members of this organization are Roy Young, Ralph Wood and Thomas Sayers. The selection rendered was "Hearts and Flowers."

A piano duet by Misses Anna and Bessie Mahoney was well received, and was followed by a vocal solo entitled "May Time," by Ed Mackintosh.

Then followed a rare musical treat, prefer to concede a raise in wages to and one which it is seldom the good a shorter work day, and the \$4 rate fortune of East Liverpool to listen to. Miss Betta Rhineberger, of Nauvoo, Ill., a guest at the home of Dr. and Mrs. W. W. Hamilton, had been prevailed upon to allow her name to go on the program for a piano solo, and the result was well worth the effort. Miss Rhineberger is a complete master of the instrument and the audience was delighted.

Miss Kate McKeever rendered Love, I Dream of Thee." Miss Mc-Keever never sang better and her effort was appreciated by large audience.

Next came one of the most pleasing of a recitation by Miss Catherine Hickey. "The Confessional" was her subject and the very difficult selection was rendered in a manner that would have done credit to the best eluocuey is but a child, her rendition was wonderful.

Miss Rhineberger here played another solo, which, while not so classical, was equally pleasing. Roy Young, accompanied by the

other members of the Trio club, played a difficult selection upon the zylophone. The number was so well received that the young men were compelled to answer an encore.

To the accompaniment of Miss Anna Mahoney, Ed Mackintosh sang 'My Lone Nell," in a pleasing manner. The selection was an Irish ballad and was greatly enjoyed.

A piano duet by John McNicol and James Kinney followed, after which rare beauty, sang "Crossing the Bar." The accompaniment was played by Miss Elizabeth Hamil, a pianist: of unusual talent and ability.

Edward and Catherine Hickey sang 'Rachel and Reuben" pleasingly, and were followed by Miss Margaret King in a soprano solo entitled "Just Idle Dreams." Miss King sings beautiful-

The matter of securing a new pastor was talked over, but nothing definite was decided upon. The membership has grown rapidly during the past year, and the members have reason to feel proud of the record that has been

LUMBER IN DEMAND

Another Evidence That the East End Is in a Prosperous Condition.

The East End is a good market for lumber. There were no less than three lumber salesman there this morning calling on the several contractors. It is estimated that not less than three cars of lumber were ordered this morning, and it frequently occurs that as many as 10 cars of lumber are delivered to the East End every week.

Very little of this lumber is placed in stock at the several yards, but as soon as it is received it is delivered to places where new homes are being built. The East End is certainly "on the growing list."

EQUINE INTELLIGENCE.

A Writer Who Believes That Horses Are Capable of Thinking.

There are people who deny that the horse is able to plot, to conceive or reason. Some horses are duller than others, and some apparently are better equipped for thought than the men in charge of them. You teach a horse to start or stop at a word, and acts of kindness or cruelty are seldom forgotten by him. At a farm that we visit a little girl who has given sweetmeats to spirited animals can take the greatest liberties with them. The stranger has to keep a safe distance from their beels, while she may crawl between their legs. They remember her acts of kindness and carefully avoid doing anything to harm her.

We have in mind a stallion who was harshly punished. He treasured up the act of injustice, and the author of his humiliation was compelled to keep aloof from him. His manner plainly indicated that the man would get hurt if he ventured within striking distance. This stallion trusts those who have shown him consideration and in the main is not a bad tempered horse. He appears vicious only to those who have treated him viciously. His knowledge of right and wrong suggests thought. It shows capacity to reason from cause to effect. Teach a horse as you would a child what to fear and what to do. and the lesson will never be forgotten.

Some horses cunningly open their stable doors by removing pegs with their teeth and thus put plan into operation. Their imagination is fired by beautiful scenery. Put one in a paddock where he can look out upon the hills and hear the birds sing and you will quiet his nervous system. In moments of contemplation he has the dreamy look of a poet.

About the only time that a horse forgets to think is when be surreptitiously finds his way to the well filled oat bin. He then does not eat in a rational way, but gorges himself to the danger point. This is an unmistakable evidence of weakness. And yet there are men endowed with intellect who have little or no control over their appetites. Absence of restraint at the feast marks the development of the human as well as of the equine race. In our judgment, the horse sometimes thinks.-Turf, Field and Farm.

CHASING A GHOST. The Way Whale Hunters Are Some-

times Fooled by "Spouting."

While the right whale is not so large nor so vicious as the sperm whale, the danger of hunting it is greater. In company with a fleet of ships, also bound for the arctic whaling grounds, says a writer in a contemporary, we sailed from San Francisco in Febru-

ary, and early in April we encountered the edge of the ice in Bering sea. The whales live far in the ice, and thither we went to find them. Occasionally a mother seal with one or two pups would dispute our way. She would not fly because of the little ones, holding her ground quietly, with fear in her eyes, while the pups barked vigorously at our presumption in disturbing them.

We had been "sing" for more than a week when we reached Cape Navarin, on the Siberian coast, a bleak, mountainous, dreary place. The next morning we saw another ship coming toward us, the dense black smoke from her try works showing she had recently caught a whale. In the afternoon we pushed on beyond the cape, and the lookout was cautioned to be extra vigilant. From his place in the crow's nest he scoured the sea with a long glass, and presently there came the welcome cry, "Blo-o-o-w off the lee bow!"

Every man strained his eyes. On the edge of the ice some two miles away was the familiar spout. The wind had died away until there was not a ripple on the sea. Boats were lowered, sails set and everything made ready. We drifted about helplessly. Every man knew that to place an oar or paddle in the water would "gally" the whale, for the big animals have a marvelous ly acute sense of hearing, and the minute there is an unusual sound they dis appear.

One boat drifted in the direction of the spouting, which continued with clocklike regularity. Presently the sail of that boat was dropped, and the men rowed back to the ship. We had been "chasing a ghost." The spouting was caused by water spurting through a hole in the ice with each heavy

The trailing arbutus has only one very near relative, and it lives in Japan. This tells to the botanist a strange story. When North America was warmer, the parent of both spread over northern America and Asia. With the descent of the ice cap, in the glacial period, the flowers were forced downward, one on the east coast of Asia and one on the east coast of America. They have been separated just long enough and under surroundings just different enough to have made a little difference in their appearance and habit, and yet their common origin is still easily traceable.-Ladies' Home Jour-

CHASING A GHOST.

The Way Whale Hunters Are Sometimes Fooled by "Spouting."

While the right whale is not so large nor so vicious as the sperm whale, the danger of hunting it is greater. In company with a fleet of ships, also bound for the arctic whaling grounds, says a writer in a contemporary, we sailed from San Francisco in February, and early in April we encountered the edge of the ice in Bering sea. The whales live far in the ice, and thither we went to find them. Occasionally a mother seal with one or two pups would dispute our way. She would not fly because of the little ones, holding her ground quietly, with fear in her eyes, while the pups barked vigorously at our presumption in disturbing

We had been "sing" for more than a week when we reached Cape Navarin, on the Siberian coast, a bleak, mountainous, dreary place. The next morning we saw another ship coming toward us, the dense black smoke from her try works showing she had recently caught a whale. In the afternoon we pushed on beyond the cape, and the lookout was cautioned to be extra vigilant. From his place in the crow's nest he scoured the sea with a long glass, and presently there came the welcome cry, "Blo-o-o-w off the lee

Every man strained his eyes. On the edge of the ice some two miles away was the familiar spout. The wind had died away until there was not a ripple on the sea. Boats were lowered, sails set and everything made ready. We drifted about helplessly. Every man knew that to place an oar or paddle in the water would "gally" the whale, for the big animals have a marvelously acute sense of hearing, and the minute there is an unusual sound they dis-

One boat drifted in the direction of the spouting, which continued with clocklike regularity. Presently the sail of that boat was dropped, and the men rowed back to the ship. We had been "chasing a ghost." The spouting was caused by water spurting through a hole in the ice with each heavy

Trusts Are Merely Working Out a Law Of Nature

S A MAN EXTENDS HIS BUSINESS, YOU ASK, IS IT JUST FOR HIM TO DO IT AT THE EXPENSE OF OTHER SMALLER CONCERNS? Large concerns often shut out the smaller men who cannot compete. The smaller man may lack the experience, the plant, the funds and proper preparations and cannot sell so cheaply

as his larger competitor.

Oftentimes we cannot reconcile this fact. It seems to us contrary to the Golden Rule. Let us go back and examine the true causes. The big businesses increase because they can by the use of advanced methods and appliances place their goods on the market cheaper than can the smaller concerns. They are thus able to benefit a great number of people.

Considered from this standpoint they are certainly justifiable, for THEY ARE DOING THE GREATEST GOOD TO THE GREATEST NUMBER OF PEOPLE, even though it may be at the expense of a few. A war may cost many lives, but it is for the good of the country at large. The growth of a large business is merely a survival of the fittest. The state of the

Consider whether it is better to use modern means of turning out products, doing better what we do and doing much more, or for a larger number to be engaged in a smaller number of industries which are being conducted on old fashioned methods. The modern methods should be employed, even at the expense of the few.

Trusts Are Merely Working Out a Law Of Nature

S A MAN EXTENDS HIS BUSINESS, YOU ASK, IS IT JUST FOR HIM TO DO IT AT THE EXPENSE OF OTHER SMALLER CONCERNS? Large concerns often shut out the smaller men who cannot compete. . The smaller man may lack the experience, the plant, the funds and proper preparations and cannot sell so cheaply

as his larger competitor. Oftentimes we cannot reconcile this fact. It seems to us contrary to the Golden Rule. Let us go back and examine the true causes. The big businesses increase because they can by the use of advanced methods and appliances place their goods on the market cheaper than can the smaller concerns. They are thus able to benefit a great number of people.

Considered from this standpoint they are certainly justifiable, for THEY ARE DOING THE GREATEST GOOD TO THE GREATEST NUMBER OF PEOPLE, even though it may be at the expense of a few. A war may cost many lives, but it is for the good of the country at large. The growth of a large business is merely a survival of the fittest.

Consider whether it is better to use modern means of turning out products, doing better what we do and doing much more, or for a larger number to be engaged in a smaller number of industries which are being conducted on old fashioned methods. The modern methods should be employed, even at the expense of the few.

LEATHER LED LIST

In the Stock Market, Wednesday Some Features of the Session.

New York, April 3.- The naming of the most active stocks in Wednesday's market is in itself an illuminating commentary on the character of the market. United States Leather led the list, followed at a considerable interval by Amalgamated Copper. The dealings of Colorado Fuel fell to quite insignificant proportions in com parison with the recent trading. Su gar was well up in the list of active stocks. Of the prominent railroads only St. Paul and Louisville and Nashville showed a notable degree of activity and the fluctuations did not reach as much as a point in either of them. The extreme range in the Unit common and 1/4 for the preferred, and strong, the common rising 4 and the preferred 2. Rumors were revived of a plan to retire the preferred stock at par. The decline in the Buffalo Rochester and Pittsburg stocks was doubtless due to the ... miners' strike in its territory. The movement in the general list was insignificant. advanced a fraction, but no other cause was apparent than they declined Tuesday. The crop report by the government weather bureau had some influence upon sentiment, but the present grain markets are regard ed as under the artificial influence of large speculative operators and are therefore distrusted as an index of actual conditions. The statistics of approaching agreement upon the output and price were given some credence. Future money market developments are still awaited, the easy ten-

be taken before the pardon board That body took up his case three weeks ago and refused to interfere. He was again re-sentenced and an ap plication was at once made for another respite in order that the case might go before the supreme court for a re-hearing. The application was denied, however, as the supreme court had passed on the case before Sheets escaped from jail.

Sheets never lost hope that some thing would interfere to save his life. His escape from jail just before the day first set for his execution and the respite granted after his re-capture, inspired in him the belief that he bore a charmed existence and that a way to escape the penalty of the law would be found at the proper time. This is Not an Experiment, the Process Has Already Been Thoroughly Demonstrated.

The Company's plant at Chester is now ready for operation, and the material to be used in the manufacture of the Gas has been ordered and will be shipped immediately.

The Ohio house of representatives has passed, without a dissenting voice, a bill providing severe punishment for crimes committed or attempted by anarchists. The bill defines anarchy impair or subvert the federal or state government. A successful attempt to kill the president, vice president or any official in the line of succession ing at his home on First street. He or the governor or lieutenant governor of Ohio is made punishable by attempt is unsuccessful, the penalty provided is imprisonment in the penitentiary for life. No prisoner so sentenced shall be paroled or pardoned unless on proof of his innocence. Anarchistic conspirators, including persons making threats or attempting justification of attempts to kill officials mentioned in the act, shall be punished, according to the bill, by imprisonment in the penitentiary for from 10 to 30 years and shall forfeit all rights of citizenship Such an act is needed in Ohio and everywhere else in the country, and the senate should promptly make the measure a law.

POTTERY NEWS

Jiggermen's local No. 12 held quite an important meeting last evening. One of the first matters considered was that of a letter from the Goodwin pottery, asking for a price for the manufacture of a new covered butter dish. It was decided that eight cents should be paid for the bottom, while six cents should be paid for the cover. The pressers at their last meeting de cided what the sticker-up should receive on this new piece. A communication was received from the finishers, but it was referred back to that local for correction. In this letter the finishers failed to state what price should be paid for coup soups, although the finishers state that they could not be finished for \$1.25. A let ter from the striking carriage and wagon workers of Cincinnati and Zanesville, thanking the local for their recent donation. The Ohio house of representatives has passed, without a dissenting voice, a bill providing severe punishment for crimes committed or attempted by anarchists. The bill defines anarchy as an offense affecting or tending to impair or subvert the federal or state ernment A successful attempt to attempt is unsuccessful, the penalty brothers and sisters. provided is imprisonment in the penitentiary for life. No prisoner so sentenced shall be paroled or pardoned unless on proof of his innocence. Anarchistic conspirators, including persons making threats or attempting justification of attempts to kill officials mentioned in the act, shall be punished, according to the bill, by imprisonment in the penitentiary for from 10 to 30 years and shall forfeit all rights of citizenship Such an act is needed in Ohio and everywhere else in the country, and the senate should promptly make the measure a law.

Jiggermen's local No. 12 held quite an important meeting last evening. One of the first matters considered was that of a letter from the Goodwin pottery, asking for a price for the manufacture of a new covered butter ish island are proving so flimsy that dish. It was decided that eight cents should be paid for the bottom, while six cents should be paid for the cover. The pressers at their last meeting de cided what the sticker-up should receive on this new piece. A communication was received from the finishers, but it was referred back to that local for correction. In this letter the finishers failed to state what price should be paid for coup soups, although the finishers state that they could not be finished for \$1.25. > It will not be long now until work will be commenced at the new pottery at Barberton. A letter received in this city yesterday afternoon stated that several of the kilns were completed, and that at least three more would be topped out this week. Work placing the machinery is progressing rapidly, and yesterday five barrels of blocks from which the moulds will be made were shipped to Barberton from this city. Len Albright, who will have charge of the mould shop, will leave for Barberton Saturday evening. He will be accompanied by Robert Hawkins, who will have charge of the clay shops at the new plant. All the mater. ials which have been in use at the temporary quarters on Second street in this city, will be taken to Barberton. Four men will be employed in the mould shop at the beginning, two of whom come from the Akron China, while another will leave the East Palestine shop.

The employes of the C. & P. railroad company, working in the West intent. End shops, have come to the conclusion that a 10-hour day for their labor is sufficient. For over four months they have been working 13 hours per day four days in every week. As a result the men feel that they have been gradually wearing themselves out; in fact, quite a number of them, it is said, are now confined to their homes and they credit it solely to

Although sentiment has been strong against the extra three hours for two months no definite steps were taken in the matter until Tuesday evening when the men employed in the boiler department commissioned a committee of three to notify the master mechanic that they positively would not work any more 13 hour days. Their action was not altogether unexpected and they were allowed to strike without a remonstrance.

The ultimatum was not apparent until late yesterday afternoon, when it was easily to be seen that the entire mill. lot of workmen intended to follow the steps of the boiler makers. The officials at the shops were not notified that a general strike is to be declared, but such is the case. A petition presented to the men in the machine department for their signatures, signifying that they are not only against the long day, but that they positively will stand it no more, was signed by the majority of them and the result is quite evident.

Wednesday being one of the 10hour days the men were not given a chance last night to inform the offisee their determination, but it is stated, by good authority, that the notification will be made tonight. The men are not being censured in the least for their action, as it is simply a matter of hours and not wages, as is usually the case.

Strange Effects of Extreme Cold. Dr. Moss of the English polar expedition of 1875-77, among many other things, told of the strange effects of the extreme cold upon the candles they burned. The temperature was from 35 to 50 degrees below zero, and the doc tor says he was considerably discouraged when upon looking at his candle he discovered that the flame "had all it could do to keep warm." It was so cold that the flame could not melt all of the tallow of the candle, but was forced to eat its way down, leaving a sort of skeleton candlé standing. There was heat enough, however, to melt odd staped holes in the thin walls of tallow, the result being a beautiful lacelike cylinder of white, with a narrow tongue of yellow flame burning on the inside and sending out many streaks of

THIRTEEN HOURS TOO LONG A DAY

C. & P. Shop Employes Object and city. Demand Ten Hours Hereafter.

BOILER MAKERS GO OUT

And the Rest Will Follow Their Example Unless Their Request Is Acceded To-Present High Pressure Work Has Now Lasted Months.

The employes of the C. & P. railroad company, working in the West intent. End shops, have come to the conclusion that a 10-hour day for their labor is sufficient. For over four months they have been working 13 hours per day four days in every week. As a result the men feel that they have teen gradually wearing themselves out; in fact, quite a number of them, it is said, are now confined to their homes and they credit it solely to

Although sentiment has been strong against the extra three hours for two months no definite steps were taken in the matter until Tuesday evening when the men employed in the boiler department commissioned a committee of three to notify the master mechanic that they positively would not work any more 13 hour days. Their action was not altogether unexpected and they were allowed to strike without a remonstrance.

The ultimatum was not apparent until late yesterday afternoon, when it was easily to be seen that the entire lot of workmen intended to follow the steps of the boiler makers. The officials at the shops were not notified that a general strike is to be declared, but such is the case. A petition presented to the men in the machine department for their signatures, signifying that they are not only against the long day, but that they positively will stand it no more, was signed by the majority of them and the result is quite evident.

Wednesday being one of the 10hour days the men were not given a chance last night to inform the officicls of their determination, but it is stated, by good authority, that the notification will be made tonight. The men are not being censured in the least for their action, as it is simply tter of hours and not wages as is usually the case.

Strange Effects of Extreme Cold. Dr. Moss of the English polar expedition of 1875-77, among many other things, told of the strange effects of the extreme cold upon the candles they burned. The temperature was from 35 to 50 degrees below zero, and the doc tor says he was considerably discouraged when upon looking at his candle he discovered that the flame "had all it could do to keep warm." It was so cold that the flame could not melt all of the tallow of the candle, but was forced to eat its way down, leaving a sort of skeleton candlé standing. There was heat enough, however, to melt odd staped holes in the thin walls of tallow, the result being a beautiful lacelike cylinder of white, with a narrow tongue of yellow flame burning on the inside and sending out many streaks of light into the darkness.

Eating Scals In England.

The water baily of London brought a "quick" seal to court, receiving 26 shillings 8 pence (1530), and in the same year the item "for bringing a cele" 15 shillings occurs. Seals were eaten, though they may have been kept as a curiosity. One was presented to Cromwell, Wolsey's successor in Menry's fa vor, though it died before he could have derived much pleasure from it. Perhaps he ate it. At Henry VII.'s wedding feast in 1487 one of the dishes was "seyle in fenyn, entirely served richly," and very rich it must have been. In Cromwell's accounts for 1537 William Wodehouse's servant brings a porpoise, and porpoises we know are eaten.-Good Words.

Highflown Language.

In the east the flow of language in praise of rulers is sometimes wonderful. The Burmese greeting Lord Curzon, viceroy of India, at the Royal lakes, declared that "his glory shines resplendent as the orb of day, his intellect is as farreaching as the lightning. May he be as glorious as the sun and moon!"

The Prince of Wales was extolled by an oriental subject as "great thief" under the impression that this was the highest possible compliment. Another monarch was named "the protector of all vegetables, regulator of the seasons, absolute master of the ebb and flow of

Obliged to Live on Bread and Milk but Worth Over \$200,000,000.

Blood Wine Effects Interesting Cure of Dyspepsia.

Few people know that the Standard Oil King, whose wealth is so great that he can't count it, but estimated to be somewhere between two and three hundred millions, has been troubled for years with a serious derangement of the digestive organs, and while he could live produced he has been compelled to eke out an existence on bread and milk. His case has recently been brought before the attention of the proprietors of "Blood Wine," who after a careful study of his trouble decided that their remedy would help him; and several bottles have just been shipped to the multi-million-aire. If Mr. Rockefeller takes "Blood Wine" as directed by the chemist, whose skill figured prominently in compounding this splendid remedy, we shall undoubtedly hear of his normal functions being restored.

JOHN D. ROCKEFELLER.

Stomach troubles, weaknesses throughout the digestive organs which cause constipation and upset the equilibrium of the whole system are brought on by irregular meals, imprudent eating and drinking, and a lack of the proper nonrishment for the organs which secrete the gastric juices and make assimilation of the food possible. Some discretion should be exercised where stomach trouble is apparent, which if done and trouble is apparent, which if done and directions followed in using "Blood Wine," a permanent cure is almost sure to follow. "Blood Wine" makes diges-tive fluids. It supplies the missing something in the stomach that aids the digestion. It will overcome sick stomach, nausea, vomiting, help you to retain your

food, and give you a good appetite.
It extracts the nourishment from the food and turns it into flesh, tissues, membranes, nerves and muscles. It will cure in a reasonable time old cases of constipation and give the bowels a free easy action at regular periods. "Blood Wine" contains no wine or opiates.

"I sat at my desk all day and for twenty-five years was troubled with constipation. My bowels would not move except by fits and starts and my breath and saliva threw off an awful odor; my face burned, eyes ached and I had a dragged-out feeling all the time. Regular medical aid failed to produce but temporary relief. With some prejudice I tried 'Blood Wine.' One bottle helped me. I then had more faith in it and got another bottle. By using a little common sense in my mode of living and the use of four bottles I effected a thorough cure and now I am actually a different, practically a new, man. William Curtin, Box 1246, Boston,

GRAND JURY ACTS. The Modern

Indictments Returned Against Ten Members of Wheeling City Council.

SOLITCITING BRIBES CHARGED.

The Chief of the Fire Department Indicted, Accused of Offering Bribe-About 120 Saloonists Indict ed For Sunday Selling.

Wheeling, W. Va., April 3 .- The Ohio county grand jury, after being in session over a week, yesterday brought in indictments against 10 members of the second branch of council for solicitation of bribes from the City Railway company, to which a franchise was granted last week. The members indicted are:

President Jesse Shafer and Councilmen Plant, Maurer, St. Myers, Ackerman, Weiser, Hill, Scheehle, Weidner and Marshall. Chief of the Fire Department Robert D. Cline also was indicted on Shafer's allegation that Cline offered him \$2,500 for his vote for the city company's ordinance.

About 120 saloonists were indicted for Sunday selling.

The announcement of the grand jury's findings created a profound sensation and interesting developments are predicted. The councilmen under indictment will enter their pleas on

Manufacturers Say They Will Not Grant Men's Demands.

Augusta, Ga., April 3 .- The following notice, signed by the president of account of the hospitality shown the the mill in which it was posted, was put on the bulletin board in every mill in the Augusta district yester day:

"Owing to the demand made on John P. King Manufacturing company for an advance of 10 per cent, accompanied by a notice that if not granted its operatives would refuse to work after Saturday, April 5, and said demand having been refused, notice is hereby given to the employes of this company that should such a strike be inaugurated this mill wi'l indefinitely on Tuesday. April 8."

This order is a result of the decision by the Manufacturers' association to fight the union. It means that if the strike goes on in the King mill, as scheduled, every mill in Augusta. Graniteville, Aiken, Warrenville, Vaacluse and Langley will be closed, throwing 10,000 operatives out of work. Union leaders insist that the strike will take place Monday, although many operatives are opposing it.

Financier Must Be a Statesman

By Senator ALBERT J. BEVERIDGE of Indiana

HE financier of the twentieth century must be more than a financier.

THE MODERN FINANCIER MUST BE A STATES-

The day of the local Wall street capitalist is passed. The day when the wizard of tricks sat in

his office and considered that the world of money was compassed by his eyesight was struck yesterday, and that hour is no more forever. Today the capitalist can no longer indulge in the legerdemain of mere stock speculation. HE MUST BUILD MACHINERY, HE MUST ERECT MILLS, HE MUST CONSTRUCT RAIL-ROADS, HE MUST BUY STEAMSHIP LINES. THERE-FORE HE MUST UNDERSTAND THE PEOPLE, HE MUST CONSIDER THE PEOPLE.

THE CONSTRUCTIVE CAPITALISTS OF AMERICA HAVE COME TO UNDERSTAND THAT PUBLIC OPINION MUST BE TAKEN INTO ACCOUNT.

And so we see that voluntarily the greatest corporation of the world has published to all the people a statement of its business and its operations, of its assets and its liabilities, of its products and its sales, of its history and its prospects. That is the thing which the financier of ten years ago would have called chimerical, foolish, the unwise pandering of the theorist to the curiosity of the crowd.

INDIGNANT AT BRITISH.

Venezuelan Paper Condemns Hospitality to Rebel Steamers.

Caracas, April 3 .- The Republica, semi-official newspaper, has recently published several indignant ar ticles directed against the authorities of the British island of Trinidad on Matos revolutionary steamer Bolivar, formerly the Libertador and the Ban Righ, in permitting her to enter the harbor of Port of Spain and coal and repair there, notwithstanding the fact that friendly relations exist between Great Britain and Venezuela.

The Republica urges the Venezuelan government immediately to adopt reprisals against Trinidad by excluding all vessels from that islant from the eastern ports of Venezuela and by the imposition of an additional duty of 30 per cent on all goods brought to Venezuela by British steamers touching at Trinidad.

The Republica also urges Venezuela to demand an indemnity from Great Britain for damages resulting from the operation of the Bolivar, and cites the Alabama case as a precedent for such action.

MAY CALL OUT MORE MEN.

Smaller Operators Didn't Feel Bound by Altoona Scale.

Altoona, Pa., April 3.-Not a mine of the Rochester and Pittsburg Coal and Iron company was working yesterday. President Gilday, Secretary Gilbert and National Officers Mc-Kay and Rice were in conference at Clear field last night. They telegraphed for National President Mitchell, but he answered that he was unable to visit this district at present. Several of the smaller operators

in Cambria county, who did not at tend the Altoona convention and whi do not feel bound by the action of the large operators, have failed to sign the scale. The miners propose to give them a time limit, at the end of which, if the scale is not signed, the men will be called out. Three hundred men employed in a mine at Hastings quit work Tuesday because the operator, James L. Mitchell, refused to sign the scale unless the check-off clause was eliminated. Mr Mitchell took possession of the mine since the Altoena convention ad-

SIXTEEN WERE KILLED.

14 Widows and 58 Orphans, Due to Tennessee Explosion.

Chattanooga, Tenn., April 3.-In vestigation yesterday revealed the fact that the Nelson mine at Dayton, in which the explosion occurred, is not on fire and has not been. Workmen were engaged yesterday excavating the debris. The funerals of the victims were held yesterday. Altogether there were 16 killed, leaving 58 orphans and 14 widows. The miners claim that the explosion was due to failure to sprinkle the mine on Sunday. The prevailing opinion seems to be that it was caused by a combination of coal dust and gas in the mine.

The officials of the Dayton Coal

and Iron company stated that they have not progressed sufficiently in their investigations to make a full statement, but they claim that the Nelson was one of the best governed mines in Dayton.

LANE EXPRESSED NO REGRET. Said Furbush Woman and Children Deserved to Die.

Philadelphia, April 3.--After a purely informal hearing yesterday, William Lane, the colored servant who on Tuesday murdered Mrs. Ella J. Furbush and her daughter Madeline, and fatally injured Eloise Furbush, another daughter, was held to await the action of the coroner. Lane was perfectly cool and collected and expressed no regret for his crime. When asked what caused him to kill the women and children he said: "They deserved to die."

On learning that Eloise was still living, but sinking rapidly he said: "I am sorry she suffers so much. I ture, a temporary organization being did not intend that she should suffer."

ROCKEFELLER'S STOMACH.

Obliged to Live on Bread and Milk but Worth Over \$200,000,000.

Blood Wine Effects Interesting Cure of Dyspepsia.

Few people know that the Standard Oil King, whose wealth is so great that he can't count it, but estimated to be somewhere between two and three hundred millions, has been troubled for years with a serious derangement of the digestive organs, and while he could live on the best the markets of the world produced he has been compelled to eke out an existence on bread and milk. His case has recently been brought before the attention of the proprietors of "Blood Wine," who after a careful study of his trouble decided that their remedy would help him; and several bottles have just been shipped to the multi-million-If Mr. Rockefeller takes "Blood Wine" as directed by the chemist, whose skill figured prominently in compound-ing this splendid remedy, we shall un-doubtedly hear of his normal functions being restored.

JOHN D. ROCKEFELLER.

Stomach troubles, weaknesses throughout the digestive organs which cause constipation and upset the equilibrium of the whole system are brought on by irregular meals, imprudent eating and drinking, and a lack of the proper nonrishment for the organs which secrete the gastric juices and make assimilation of the food possible. Some discretion should be exercised where stomach trouble is apparent, which if done and directions followed in using "Blood Wine," a permanent cure is almost sure to follow. "Blood Wine" makes diges-tive fluids. It supplies the missing some-"Blood Wine" makes digesthing in the stomach that aids the digestion. It will overcome sick stomach, nausea, vomiting, help you to retain your food, and give you a good appetite.

It extracts the nourishment from the

food and turns it into flesh, tissues, membranes, nerves and muscles. It will cure in a reasonable time old cases of constipation and give the bowels a free easy action at regular periods. "Blood Wine' contains no wine or opiates.

JURY ACTS. The Modern Financier Must Be a Statesman

By Senator ALBERT J. BEVERIDGE of Indiana

The day of the local Wall street capitalist is

passed. The day when the wizard of tricks sat in his office and considered that the world of money was compassed by his eyesight was struck yesterday, and that hour is no more forever. Today the capitalist can no longer indulge in the legerdemain of

mere stock speculation. HE MUST BUILD MACHINERY, HE MUST ERECT MILLS, HE MUST CONSTRUCT RAIL-ROADS, HE. MUST BUY STEAMSHIP LINES. THERE-FORE HE MUST UNDERSTAND THE PEOPLE, HE MUST CONSIDER THE PEOPLE.

THE CONSTRUCTIVE CAPITALISTS OF AMERICA HAVE COME TO UNDERSTAND THAT PUBLIC OPINION MUST BE TAKEN INTO ACCOUNT.

And so we see that voluntarily the greatest corporation of the world has published to all the people a statement of its business and its operations, of its assets and its liabilities, of its products and its sales, of its history and its prospects. That is the thing which the financier of ten years ago would have called chimerical, foolish, the unwise pandering of the theorist to the curiosity of the crowd.

INDIGNANT AT BRITISH.

Venezuelan Paper Condemns Hospitality to Rebel Steamers.

Caracas, April 3 .- The Republica, a semi-official newspaper, has re cently published several indignant ar ticles directed against the authorities of the British island of Trinidad on account of the hospitality shown the Matos revolutionary steamer Bolivar, Righ, in permitting her to enter the harbor of Port of Spain and coal and repair there, notwithstanding the fact that friendly relations exist between Great Britain and Venezuela.

The Republica urges the Venezuelan government immediately to to work after Saturday, April 5, and adopt reprisals against Trinidad by excluding all vessels from that islant from the eastern ports of Venezuela and by the imposition of an additional duty of 30 per cent on all goods indefinitely on Tuesday, brought to Venezuela by British steamers touching at Trinidad.

The Republica also urges Veneion by the Manufacturers' association zuela to demand an indemnity from Great Britain for damages resulting the strike goes on in the King mill, from the operation of the Bolivar, and as scheduled, every mill in Augusta, cites the Alabama case as a precedent LANE EXPRESSED NO REGRET. for such action.

SIXTEEN WERE KILLED.

14 Widows and 58 Orphans, Due to Tennessee Explosion.

Chattanooga, Tenn., April 3.-Investigation yesterday revealed the fact that the Nelson mine at Dayton, in which the explosion occurred, is not on fire and has not been. Workmen were engaged yesterday excavating the debris. The funerals of the victims were held yesterday. Altogether there were 16 killed, leaving 58 orphans and 14 widows. The miners claim that the explosion was due to failure to sprinkle the mine on Sunday. The prevailing opinion seems to be that it was caused by a

combination of coal dust and gas in the mine. The officials of the Dayton Coal

and Iron company stated that they have not progressed sufficiently in their investigations to make a full

SNOW BOUND ON A TRAIN.

Judge Overruled Demurrers In Dam Party Suffered Hardships For Four Days and Five Nights-Sick Man Attempted Suicide.

> St. Faul, April 3.-Passengers artiving yesterday on a Great Northern train due last Friday tell of being snowbound for four days and five kota in the midst of the worst blizzard the northwest has seen in many frugal meals a day, and with such a small amount of fuel that the ladies had to wrap themselves in blankets and the men to wear their overcoats

> There was an incipient riot on the first day. The second class passengers insisted that they must have as much or more food as the others, and as they were in larger numbers and had more ravenous appetites it was difficult to confine them to hteir quota. Many were not willing, as the first class passengers insisted that the women and children should be fed and taken care of first, but after some argument they were prevailed upon to subside.

Monday evening Prof. Colegrove, ci the University of Washington, who had been despondent and morose, attempted suicide by cutting his throat with a razor. There was a physician on the train, but he had no facilities for performing the necessary operation, and it was absolutely necessary to get into communication with one of the neighboring towns.

A telegraph instrument was found on the train, and an electrician open ed communication. A snow plow worked each way, with a surgeon on each engine following. Finally the one from Minot reached there after a hard night's work. The injured man was taken to St. Paul. He may not recover.

The almost famished passengers, who had suffered from the cold and exposure, were given food and warm berths in the first train pushed through the drifts.

COLLOQUIES OF SENATORS.

They Enlivened Discussion of the Oleomargarine Bill.

Washington, April 3.-Discussion of the oleomargarine bill in the senate yesterday was enlivened by two or three bright colloquies between senators. Mr. Bailey, of Texas, concluded his speech begun Tuesday in opposition to the measure, occupying most of the time devoted by the senate yesterday to the bill's consideration. His argument was brilliant and at times eloquent, and attracted the careful attention of senators on both sides of the chamber and of the oc cupants of the crowded galleries. He was followed by Mr. Depew, of New York, in a bright and witty speech in support of the measure. Mr. Depew matched his wit with that of Mr. Bailey on the subject of the American girl, and the sallies of the two senators were greeted with shouts of laughter, both on the floor and in the galleries. The Texan's keen reference to the recent marriage of Mr Depew was happily fenced by the New York senator in his reference to the love and admiration excited in woman by "the youth and beauty" of

A Relie of the Crucifixion Preserved at Bruges.

Many cities profess to possess as a relic some of the blood of Christ, preserved from that which flowed from him during the crucifixion. St. Louis brought particles to Paris which he had received from the emperor of Constantinople. The Church of St. John Lateran, in Rome; the Imperial monastery at Weingarten, a church in Mantua and the Chapel of the Precious Blood, in Bruges, all put forward similar claims.

Travelers in the celebrated Death valley of California have described the wonderful contortions of the sand pillars that small whirlwinds sometimes send spinning across the hot plain. Even more remarkable are the "dust devils" seen by Mr. H. F. Witherby, the English explorer, in the valley of the White Nile. Sometimes two of these whirling columns, gyrating in opposite directions, meet, "and if they be well matched the collision stops them and a struggle ensues as to which way hey shall twist. Gradually one the mastery, and the two combined begin to gyrate alike and then rush on together." Some of these whirls will strip the clothes from an Arab's back or twist a goat round and round like a top.

Days and Five Nights-Sick Man Attempted Suicide.

SNOW BOUND ON A TRAIN.

St. Faul, April 3 .- Passengers arby the water works tunnel contrac riving yesterday on a Great Northern were recently filed by the adminis snowbound for four days and five trators of 11 men who were killed by nights on the prairies of North Daan explosion in 1898. Judge Phillips kota in the midst of the worst blizheld that the petitions filed showed zard the northwest has seen in many years, with only food enough for two frugal meals a day, and with such a small amount of fuel that the ladies

had to wrap themselves in blankets

There was an incipient riot on the first day. The second class passengers insisted that they must have as much or more food as the others, and as they were in larger numbers and had more ravenous appetites it was difficult to confine them to hteir quota. Many were not willing, as the first class passengers insisted that the women and children should be fed and taken care of first, but after some argument they were pre-

vailed upon to subside. Monday evening Prof. Colegrove, ci the University of Washington, who had been despondent and morose, attempted suicide by cutting his throat with a razor. There was a physician on the train, but he had no facilities for performing the necessary operation, and it was absolutely necessary to get into communication with one of the neighboring towns.

A telegraph instrument was found on the train, and an electrician open ed communication. A snow plow worked each way, with a surgeon on each engine following. Finally the one from Minot reached there after not recover.

COLLOQUIES OF SENATORS.

They Enlivened Discussion of the Oleomargarine Bill.

Washington, April 3.-Discussion of the oleomargarine bill in the sen-Manila, April 2, of First Lieutenant ate yesterday was enlivened by two or three bright colloquies between senators. Mr. Bailey, of Texas, concluded his speech begun Tuesday in opposition to the measure, occupying most of the time devoted by the senate yesterday to the bill's consideration. His argument was brilliant and at times eloquent, and attracted the careful attention of senators on both sides of the chamber and of the oc cupants of the crowded galleries. He was followed by Mr. Depew, of New York, in a bright and witty speech in support of the measure. Mr. Depew matched his wit with that of Mr. Bailey on the subject of the American girl, and the sallies of the two senators were greeted with shouts of laughter, both on the floor and in the galleries. The Texan's keen reference to the recent marriage of Mr Depew was happily fenced by the New York senator in his reference to ment or two and then said that it the love and admiration excited in would be much more consistent if I woman by "the youth and beauty" of

LUMBER IN DEMAND

Another Evidence That the East End Is in a Prosperous Condition.

The East End is a good market for lumber. There were no less than three lumber salesman there this morning calling on the several contractors. It is estimated that not less than three cars of lumber were ordered this morning, and it frequently occurs that as many as 10 cars of lumber are delivered to the East End every week.

Very little of this lumber is placed in stock at the several yards, but as soon as it is received it is delivered to places where new homes are being built. The East End is certainly "on the growing list."

Postoffice Business Good. Postmaster William Baird has com-

EQUINE INTELLIGENCE. A Writer Who Believes That Horses

Are Capable of Thinking.

There are people who deny that the horse is able to plot, to conceive or reason. Some horses are duller than others, and some apparently are better equipped for thought than the men in charge of them. You teach a horse to start or stop at a word, and acts of kindness or cruelty are seldom forgotten by him. At a farm that we visit a little girl who has given sweetmeats utmost good feeling prevailed during to spirited animals can take the greatest liberties with them. The stranger has to keep a safe distance from their heels, while she may crawl between their legs. They remember her acts of kindness and carefully avoid doing any-

We have in mind a stallion who was harshly punished. He treasured up the act of injustice, and the author of his humiliation was compelled to keep aloof from him. His manner plainly indicated that the man would get hurt if he ventured within striking distance. This stallion trusts those who have shown him consideration and in the main is not a bad tempered horse. He appears vicious only to those who have treated him viciously. His knowledge of right and wrong suggests thought. It shows capacity to reason from cause to effect. Teach a horse as you would a child what to fear and what to do

Some horses cunningly open their stable doors by removing pegs with their teeth and thus put plan into operation. Their imagination is fired by beautiful scenery. Put one in a paddock where he can look out upon the hills and hear the birds sing and you will quiet his nervous system. In moments of contemplation he has the dreamy look of a poet.

and the lesson will never be forgotten.

About the only time that a horse forgets to think is when he surreptitiously finds his way to the well filled oat bin. He then does not eat in a rational way, but gorges himself to the danger point. This is an unmistakable evidence of weakness. And yet there are men endowed with intellect who have little or no control over their appetites. Absence of restraint at the feast marks the development of the human as well as of the equine race. In our judgment, the horse sometimes thinks.-Turf, Field and Farm.

Crusts and crumbs of bread left over from the table should be dried, put aside for rolling and dipping or to be used in scalloped dishes or mixed with a few sliced apples and baked and served as a dinner dessert.

To prevent sausages bursting when cooking put them into a saucepan, cover them with cold water and bring this to a boil, after which take them out and fry them in the usual way. This, it is said, will not only prevent the sausages from bursting, but will improve their flavor.

An Atchison Lynching.

Here is a story of a lynching in the early days of Atchison: A man named Sterling was hanged first. He was a vicious fellow and did not flinch. Indeed, while the rope was around his neck he announced that he was the best man in Kansas. Sandy Corbin. one of the lynching party, was somewhat of a fighter himself and did not like Sterling's talk. "Men," he said to the lynchers, "if you will postpone proceedings .ten minutes I will take the conceit out of this scoundrel." The committee thought it would not be proper to let Sandy whip Sterling before hanging him, and the lynching went on, although Sandy grumbled loud and long because Sterling's bluff was not called .- Atchison Globe.

A Tiny Flower's Great Message. The trailing arbutus has only one very near relative, and it lives in Japan. This tells to the botanist a strange story. When North America was warmer, the parent of both spread over northern America and Asia. With the descent of the ice cap, in the glacial period, the flowers were forced downward, one on the east coast of Asia and one on the east coast of America. They have been separated just long enough and under surroundings just different enough to have made a little difference in their appearance and habit, and yet their common origin is still easily traceable.-Ladies' Home Jour-

CHASING A GHOST.

The Way Whale Hunters Are Sometimes Fooled by "Spouting."

While the right whale is not so large nor so vicious as the sperm whale, the danger of hunting it is greater. In company with a fleet of ships, also bound for the arctic whaling grounds, says a writer in a contemporary, we sailed from San Francisco in February, and early in April we encountered the edge of the ice in Bering sea. The whales live far in the ice, and thither we went to find them. Occasionally a mother seal with one or two pups would dispute our way. She would not fly because of the little ones, holding her ground quietly, with fear in her eyes, while the pups barked vigorously at our presumption in disturbing

We had been "izing" for more than a week when we reached Cape Navarin, on the Siberian coast, a bleak, mountainous, dreary place. The next morning we saw another ship coming toward us, the dense black smoke from her try works showing she had recent ly caught a whale. In the afternoon we pushed on beyond the cape, and the lookout was cautioned to be extra vigilant. From his place in the crow's nest he scoured the sea with a long glass, and presently there came the welcome cry, "Blo-o-o-w off the lee

Every man strained his eyes. On the edge of the ice some two miles away was the familiar spout. The wind had died away until there was not a ripple on the sea. Boats were lowered, sails set and everything made ready. We drifted about helplessly. Every man knew that to place an oar or paddle in the water would "gally" the whale, for the big animals have a marvelously acute sense of hearing, and the minute there is an unusual sound they dis-

One boat drifted in the direction of the spouting, which continued with clocklike regularity. Presently the sail of that boat was dropped, and the men rowed back to the ship. We had been "chasing a ghost." The spouting was caused by water spurting through a hole in the ice with each heavy swell.

New York, April 3 .-- At the one hundred and third session of the New York conference of the New York Methodist Episcopal church here yes terday a formal resolution was of fered calling for action by congress looking to an amendment of the constitution of the United States so as to permit the passing of a law to provide for national prohibition. It was referred to a committee. The Rev. Dr. W. L. Davidson, of the East Obio conference and secretary of the American university in Washington, appeared before the conference as a representative of the university. He said that since the gift of \$10,000,009 by Andrew Carnegie to found a national institute he had received many letters from people who feared that the new institute would interfere with work of the American uni-Mr. Davidson declared versity. fit his opinion that the Carnegie instead of injuring the work of the American university, would be of assistance to it if it were to pursue work of original research At the night session last night Rev.

Trusts Are Merely Working Out a Law Of Nature By JOHN D. ROCKEF

A MAN EXTENDS HIS BUSINESS, YOU ASK, IS IT JUST FOR HIM TO DO IT AT THE EXPENSE OF OTHER SMALLER CONCERNS? Large concerns often shut out the smaller men who cannot compete. The smaller man may lack the experience, the plant, the funds and proper preparations and cannot sell so cheaply

as his larger competitor.

Oftentimes we cannot reconcile this fact. It seems to us contrary to the Golden Rule. Let us go back and examine the true causes. The big businesses increase because they can by the use of advanced methods and appliances place their goods on the market cheaper than can the smaller concerns. They are thus able to benefit a great number of people.

Considered from this standpoint they are certainly justifiable, for THEY ARE DOING THE GREATEST GOOD TO THE GREATEST NUMBER OF PEOPLE, even though it may be at the expense of a few. A war may cost many lives, but it is for the good of the country at large. The growth of a large business is merely a survival of the fittest.

Consider whether it is better to use modern means of turning out products, doing better what we do and doing much more, or for a larger number to be engaged in a smaller number of industries which are being conducted on old fashioned methods. The modern methods should be employed, even at the expense of the few.

Jiggermen's local No. 12 held quite an important meeting last evening. One of the first matters considered was that of a letter from the Goodwin pottery, asking for a price for the manufacture of a new covered butter dish. It was decided that eight cents should be paid for the bottom, while six cents should be paid for the cover. The pressers at their last meeting de cided what the sticker-up should receive on this new piece. A communication was received from the finishers but it was referred back to that local for correction. In this letter the finishers failed to state what price should be paid for coup soups, although the finishers state that they could not be finished for \$1.25. A let ter from the striking carriage and wagon workers of Cincinnati and Zanesville, thanking the local for their recent donation. It will not be long now until work will be commenced at the new pottery at Barberton. A letter received in this city vesterday afternoon stated that several of the kilns were completed, and that at least three more would be topped out this week. Work placing the machinery is progressing rapidly, and yesterday five barrels of blocks from which the moulds will be made were shipped to Barberton from this city. Len Albright, who will have charge of the mould shop, will leave for Barberton Saturday evening. He will be accompanied by Robert Hawkins, who will have charge of the clay shops at the new plant. All the materials which have been in use at the temporary quarters on Second street in this city, will be taken to Barberton. Four men will be employed in the mould shop at the beginning, two of whom come from the Akron China, while another will leave the East Palestine shop.

er Arrested And Placed Under \$1,-000 Bail-Prominent New Cumberland Folk Figure in a Sensation.

Chased by an enraged and excited father of the young lady he had been paying his attentions to after having been warned to desist, Herbert Huff, the 22-year-old son of the late Prosecuting Attorney Huff, of New Cumberland, was shot at three times yester-

Huff was in company with Court Stenographer Walters, of Wheeling, and at the noon hour was walking along Ridge avenue, one of the principal thoroughfares of New Cumberland. Just as he was passing the residence of J. A. Todd, an insurance agent, the front door was jerked open and Todd rushed excitedly toward Huff with a pistol in his grasp, which he began firing.

Frightened half out of their senses Huff and Walters both took to their heels with Todd in close pursuit, During the chase the man with the pistol kept up the fire until the three loads, all that the weapon contained, were exhausted. The bullets went wide of their mark, though when the shooting first began Todd was so close to Huff that it is difficult to figure out how he missed his man.

Todd was soon placed under arrest and taken before Justice Ward. He waived a hearing and was bound over to the grand jury on the charge of shooting with intent to kill. Bond was fixed at \$1,000, which was promptly

Huff is employed as a clerk in the crockery store of Stewart & Walmer and is a very prominent young man. Some time ago he kept company with Todd's daughter, but the young lady's parents objected for a reason unknown and ordered Huff to discontinue his 25c, 271/2c and 30c; 2 yards wide, 50c, love making.

This is what caused the trouble yesterday, Todd having worked himself up into a fit of rage because of Huff's failure to comply with his admonition.

Great excitement was caused by the affray. Huff and Walters were both terribly frightened. The pistol used by Todd was a 32-calibre and had any Attorney F. L. Wells left last even of the bullets struck the man they were intended for it is more than probable he would have been killed.

Strange Effects of Extreme Cold.

Dr. Moss of the English polar expe dition of 1875-77, among many other things, told of the strange effects of the extreme cold upon the candles they burned. The temperature was from 35 to 50 degrees below zero, and the doc tor says he was considerably discouraged when upon looking at his candle he discovered that the flame "had all it could do to keep warm." It was so cold that the flame could not melt all of the tallow of the candle, but was forced to eat its way down, leaving a sort of skeleton candlé standing. There was heat enough, however, to melt odd shaped holes in the thin walls of tallow, the result being a beautiful lacelike cylinder of white, with a narrow tongue of yellow flame burning on the inside and sending out many streaks of light into the darkness.

One was presented to Cromwell, Wolsey's successor in Henry's fa vor, though it died before he could have derived much pleasure from it. Perhaps he ate it. At Henry VII.'s wedding feast in 1487 one of the dishes was "seyle in fenyn, entirely served richly," and very rich it must have been. Blood Wine Effects Interesting Cure of Dyspepsia.

Few people know that the Standard Oil King, whose wealth is so great that he can't count it, but estimated to be somewhere between two and three hundred millions, has been troubled for years with a serious derangement of the digestive organs, and while he could live on the best the markets of the world produced he has been compelled to eke out an existence on bread and milk. His case has recently been brought before the attention of the proprietors of "Blood Wine," who after a careful study of his trouble decided that their remedy would help him; and several bottles have just been shipped to the multi-million-If Mr. Rockefeller takes "Blood Wine" as directed by the chemist, whose skill figured prominently in compounding this splendid remedy, we shall undoubtedly hear of his normal functions being restored.

JOHN D. ROCKEFELLER.

Stomach troubles, weaknesses throughout the digestive organs which cause constipation and upset the equilibrium of the whole system are brought on by irregular meals, imprudent eating and drinking, and a lack of the proper nonrishment for the organs which secrete the gastric juices and make assimi'ation of the food possible. Some discretion should be exercised where stomach trouble is apparent, which if done and directions followed in using "Blood Wine," a permanent cure is almost sure "Blood Wine" makes digestive fluids. It supplies the missing some thing in the stomach that aids the digestion. It will overcome sick stomach. nausea, vomiting, help you to retain your food, and give you a good appetite.

It extracts the nourishment from the food and turns it into flesh, tissues, membranes, nerves and muscles. It will cure in a reasonable time old cases of constipation and give the bowels a free easy action at regular periods. "Blood Wine" contains no wine or opiates.

"I sat at my desk all day and for twenty-five years was troubled with constipation. My bowels would not move except by fits and starts and my breath and saliva threw off an awful and my breath and salive throw on an awith odor; my face burned, eyes ached and I had a dragged-out feeling all the time. Regular medi-cal aid failed to produce but temporary relief. With some prejudice I tried 'Blood Wine.' One bottle helped me. I then had more faith i it and got another bottle. By using a little common sense in my mode of living and the use of four bottles I effected a thorough cure and now I am actually a different, practically a new, man. SOLITCITING BRIBES CHARGED.

The Chief of the Fire Department Indicted. Accused of Offering Bribe-About 120 Saloonists Indicted For Sunday Selling.

Wheeling, W. Va., April 3.-The Ohio county grand jury, after being in session over a week, yesterday brought in indictments against 10 members of the second branch of council for solicitation of bribes from the City Railway company, to which a franchise was granted last week. The members indicted are:

President Jesse Shafer and Councilmen Plant, Maurer, St. Myers, Ack erman, Weiser, Hill, Scheehle, Weidner and Marshall. Chief of the Fire Department Robert D. Cline also was indicted on Shafer's allegation that Cline offered him \$2,500 for his vote for the city company's ordinance.

About 120 saloonists were indicted for Sunday selling.

The announcement of the granl jury's findings created a profound sensation and interesting developments are predicted. The councilmen under indictment will enter their pleas on

Financier Must Be a Statesman

By Senator ALBERT J. BEVERIDGE of Indiana

The day of the local Wall street capitalist is passed. The day when the wizard of tricks sat in his office and considered that the world of money was compassed by his eyesight was struck yesterday, and that hour is no more forever.

Today the capitalist can no longer indulge in the legerdemain of mere stock speculation. HE MUST BUILD MACHINERY, HE MUST ERECT MILLS, HE MUST CONSTRUCT RAIL-ROADS, HE MUST BUY STEAMSHIP LINES. THERE-FORE HE MUST UNDERSTAND THE PEOPLE, HE MUST CONSIDER THE PEOPLE.

THE CONSTRUCTIVE CAPITALISTS OF AMERICA HAVE COME TO UNDERSTAND THAT PUBLIC OPINION MUST BE TAKEN INTO

And so we see that voluntarily the greatest corporation of the world has published to all the people a statement of its business and its operations, of its assets and its liabilities, of its products and its sales, of its history and its prospects. That is the thing which the financier of ten years ago would have called chimerical, foolish, the unwise pandering of the theorist to the curiosity of the crowd.

SIXTEEN WERE KILLED.

14 Widows and 58 Orphans, Due to Tennessee Explosion.

Chattanooga, Tenn., April 3.-Investigation yesterday revealed the fact that the Nelson mine at Dayton, in which the explosion occurred, is of the papers which resulted in the not on fire and has not been. Workmen were engaged yesterday excavating the debris. The funerals of the victims were held yesterday. Altogether there were 16 killed, leaving 58 orphans and 14 widows. The miners claim that the explosion was due to failure to sprinkle the mine on Sunday. The prevailing opinion seems to be that it was caused by a combination of coal dust and gas in the mine.

The officials of the Dayton Coal

and Iron company stated that they have not progressed sufficiently in their investigations to make a full statement, but they claim that the Nelson was one of the best governed mines in Dayton.

Days and Five Nights-Sick Man Attempted Suicide.

SNOW BOUND ON A TRAIN.

St. Faul, April 3.-Passengers ar tiving yesterday on a Great Northern tors, against whom damage suits train due last Friday tell of being were recently filed by the adminis snowbound for four days and five trators of 11 men who were killed by nights on the prairies of North Dakota in the midst of the worst blizzard the northwest has seen in many years, with only food enough for two frugal meals a day, and with such a small amount of fuel that the ladies had to wrap themselves in blankets and the men to wear their overcoats day and night to keep from freezing.

> There was an incipient riot on the first day. The second class passengers insisted that they must have as much or more food as the others, and as they were in larger numbers and had more ravenous appetites it was difficult to confine them to hteir quota. Many were not willing, as the first class passengers insisted that the women and children should be fed and taken care of first, but after some argument they were prevailed upon to subside.

Monday evening Prof. Colegrove, ci the University of Washington, who had been despondent and morose, attempted suicide by cutting his throat with a razor. There was a physician on the train, but he had no facilities for performing the necessary operation, and it was absolutely necessary to get into communication with one of the neighboring towns.

A telegraph instrument was found on the train, and an electrician open ed communication. A snow plow worked each way, with a surgeon on each engine following. Finally the one from Minot reached there after the mastery, and the two combined beman was taken to St. Paul. He may not recover.

The almost famished passengers, who had suffered from the cold and top. exposure, were given food and warm berths in the first train pushed through the drifts.

COLLOQUIES OF SENATORS.

They Enlivened Discussion of the Oleomargarine Bill.

Washington, April 3.-Discussion of the oleomargarine bill in the senate yesterday was enlivened by two or three bright colloquies between senators. Mr. Bailey, of Texas, concluded his speech begun Tuesday in opposition to the measure, occupying most of the time devoted by the senate yesterday to the bill's consideration. His argument was brilliant and at times eloquent, and attracted the careful attention of senators on both sides of the chamber and of the occupants of the crowded galleries. He was followed by Mr. Depew, of New York, in a bright and witty speech in support of the measure. Mr. Depew matched his wit with that of Mr. Bailey on the subject of the American girl, and the sallies of the two senators were greeted with shouts of laughter, both on the floor and in the galleries. The Texan's keen reference to the recent marriage of Mr Depew was happily fenced by the ment or two and then said that it the love and admiration excited in the exceptionally low rate of \$30.00.

THE SAVIOUR'S BLOOD.

A Relie of the Crucifixion Preserved at Bruges.

Many cities profess to possess as a relic some of the blood of Christ, preserved from that which flowed from him during the crucifixion. St. Louis brought particles to Paris which he had received from the emperor of Constantinople. The Church of St. John Lateran, in Rome; the Imperial monastery at Weingarten, a church in Mantua and the Chapel of the Precious Blood, in Bruges, all put forward similar claims.

The precious blood at Bruges enjoys the widest fame and is reported to have been collected from the Saviour's wounds by Joseph of Arimathea and Nicodemus when they took down the body from the cress. It was brought to Bruges by Thierry of Alsace in 1147. He had received it from his brother-inlaw, Baldwin, king of Jerusalem.

Nearly six centuries ago the extraordinary devotion paid to this relic at the middle of the last act." Bruges by the inhabitants and visitors had induced the ecclesiastical and civil me?" authorities to institute a solemn procession in which it should be borne in the streets.

A confraternity of the precious blood, consisting of thirty members, with a prevost and four chaplains, was established to guard it at all times.

The procession takes place annually, and the blood, contained in a crystal cylinder and inclosed in its shrine, is carried about with much pomp and ceremony.

"Dust Devils" of the Desert. Travelers in the celebrated Death valley of California have described the wonderful contortions of the sand pillars that small whirlwinds sometimes send spinning across the hot plain. Even more remarkable are the "dust devils" seen by Mr. H. F. Witherby, the English explorer, in the valley of the White Nile. Sometimes two of these whirling columns, gyrating in opposite directions, meet, "and if they be well matched the collision stops them and a struggle ensues as to which way they shall twist. Gradually one gains gin to gyrate alike and then rush on to gether." Some of these whirls will strip the clothes from an Arab's back or twist a goat round and round like a

The Perfect Silence.

There is no sensation in the world like that which comes over you when walking through a grove of redwoods. Their great trunks rise hundreds of feet into the air and are lost in the dense roof of foliage like the columns of an Egyptian temple grown to superhuman height. On the ground there is no underbrush, but only ferns of a size and shape that suggest a prehistoric period and fallen trunks that have lain unrotting for 3,000 years. There is no sunlight, and no birds sing. If a storm arises, it is an hour before a drop reaches the ground. Here all is as it was since creation, and there is no time. It is the perfect silence.

Those Who Invest in Gas Apparatus Construction Stock.

One of the best speculative investments open to the public is the new issue of \$6,000 worth of stock of the Gas Apparatus and Construction company. The entire capital stock of the company is but \$50,000, the stock is nonassessable. Once it is yours, without Senator Dolliver to Speak-The next your written consent you cannot be paid share in a marvelous invention; approved by the patent office chemical experts at Washington, who recommend that the patent be allowed; approved by the high salaried chemists of the greatest steel companies in the world; approved by the leading chemists of New York city, one of whom said: "I am as sure that it will accomplish its purpose as I am that the sun will rise in the morning."

Approved by the most successful union men. mechanical engineer of Pittsburg who, after examining the details, wrote: It is a wonderful conception and it is marvelously complete in detail."

The process has been proven on a mall scale. It will manufacture the gas. The only question is whether it will make it as cheap on a large scale as it did in the experimental plant, that is, for less than five cents per thousand cubic feet. If it does the company's fortune is made. One rundred times fifty thousand dollars will be less than the market value of the stock.

It is not necessary to wait long to know the result. The plant is compieted and gas will be made in less than 60 days after it is in operation.

It is not the intention of this company to manufacture gas for the market. It will only sell privileges and will derive a royalty from every foot of gas manufactured under this work. Apply at 150 Third street valuable process.

LABOR TEMPLE WAS DISCUSSED

Trades Council Appoints a Committee to Investigate the Matter.

REPORT AT NEXT MEETING

A Variety of Topics of Interest to Workingmen Taken Up at a Well Attended Meeting Held Last Evening.

Trades and Labor Council last evening held a long session. The attendance was up to the average. The most important action was the appointment of a committee on the proposed labor temple.

Credentials were received from Charles Kontnier, who was recently elected to succeed Harry Griffith as president of the street railways employes' local No. 52, and Mr. Kontnier was seated, as was also Ed McGavern, elected to fill a vacancy in the painters' union.

A communication was read from the United Garment Workers' union No. 146, of Peoria, Ill., asking that a boycott be placed on overalls and shirts made by Ward & Co., of Peoria. A strike is on at the factory and the employes are locked out. A committee composed of T. O. Terrance, Henry Schriver and Charles Wilkinson was appointed to investigate whether or not any of the boycoted goods are sold

The painters' local No. 165 submitted a communication stating that their wage scale for the next year had been signed by all local contractors. It was stated that in order to protect the contractors cards had been printed bearing their names and circulated about the disappointments. the city. This action was unanimously indorsed.

Labor council an appeal for aid was made to assist in effecting the release of an alleged representative of a labor it was claimed, had been jailed as an agitator. About \$40 was raised, but before the money was sent away and in order to fortify itself against suspected fraud, a communication was ry of the American Federation of Labor. His reply stated that no knowledge of the man claiming to be in prison had ever been given him. The

A communication from Bakers' union No. 19, of Cleveland, was read. which stated that the goods made by the Ohio Baking company are on the unfair list. A number of local firms handle goods made by the company. but it is claimed they were deceived when arranging for their sale. A resclution was passed to discourage the sale of the goods.

Employes of the Singer Machine company at South Bend, Ind., who are now on a strike, sent an appeal for aid and \$5 was raised.

A communication from the Shirt Waist and Laundry Workers' International was read, conveying the information that a firm in Troy, N. Y., is sending out a brand of collars and cuffs bearing the union label-the first ever placed on the market-and asking that they be purchased by all

During the evening a discussion arose concerning the proposition to erect a labor temple. It was decided to appoint a committee of seven to investigate the matter and report at the next meeting. Messrs, U. G. King, Anthony Smith, Robert Buchanan, Robert Webber, George Hailes, Leroy

gle in good fellowship and socialbility. He spoke of the aims and objects of the Knights of Columbus, showing that the organization stood for everything that was noble and good, and that it was the highest hope and fondest desire of its membership to carry out these principles. Owing to illness and the press of business the gentleman announced the program of responses would be interfered with to some extent. Rev. Fathers Halligan, of Wellsville; Dacey, of Steubenville, and Dr. C. A. Wingerter, of Wheeling, were unavoidably detained and would not be present.

Mr. Grafton then reviewed the subjects for the evening, touching upon each in an able and comprehensive manner. In closing his remarks the toastmaster stated he was happy to announce that the local council now had filled the position of chaplain and introduced Rev. Father T. J. Mahan, who responded to "The Church."

The gentleman told of the cruei persecutions to which the church had been subjected, and how these hardships had been borne through the years of her existence. The address was brief but masterly, and was thoroughly enjoyed.

District Deputy and Past Supreme Knight T. J. Duffy was then introduced and began his address in a happy strain. He said he had one very great objection to making after dinner speeches. He could not talk and eat. He must either refuse to eat or refrain from talking. Situated as he was it would be difficult to chose the latter course.

"The program contained a list of seven speakers," he said, "four of whom were clergymen and three laymen, one surprising feature being that the laymen are all bachelors. This fact will account in a great measure for

There opportunities, however, were limited. The layman had vastly more chance for the accomplishment of good. To come to the subject more money raised was returned to those direct, the speaker asserted Catholic who subscribed to the fund to assist eitizenship was synonymous with good citizenship. One strong argument was the loyalty of Catholics to their country at all times and under all circumstances.

> Mr. Duffy dwelt upon the life and deeds of Napoleon, how he attempted to rule without God.

> Space will not permit the use of Mr. Duffy's speech in full, but it was one of the most eloquent and logical ever listened to upon the subject, and the gentleman never appeared to better advantage.
